EDUCATION

Course	College/University	Year	Percentage
Bachelor of Technology	ABES Institute of Technology	2020-23	75.75
Diploma	Guru Nanak Dev DSEU Rohini Campus	2017-20	67.14
High School	GBSSS	2017	70.3

ACHIEVEMENTS

- **5 Star** in Python | **HackerRank**
- Achieved **First Milestone** in Cloud Ready Facilitator Program | **Google**

WORK EXPERIENCE

- **React Developer Intern** | **UpCloud Technologies**
 - Learnt Industry required skills and implemented them to solve real-world problems faced while developing medium to large scale web based applications.
 - Technologies that I have worked on in this Internship, **React.js**, **Redux.js**, **JavaScript**, **Firebase Auth**, **REST APIs**.
- **Machine Learning Intern** | **Internship Studio**
 - Solved real-world problem of training, testing, and deciding the best performing machine learning model for predicting Youtube Adview count based on various factors.
 - Technologies and packages used **Python**, **NumPy**, **Pandas**, **Matplotlib**, **Scikit-learn**, etc.
- **Graphic Designer** | **Freelancing**
 - Curated still and Motion graphic designs for Various YouTubers and businesses.
 - Also a member of Aayaam The Cultural Club handling their graphic and visual content.

SKILLS & INTERESTS

- **Programming Languages:** Python, JavaScript
- **Front-end:** HTML, CSS, Bootstrap, React.js, Redux.js
- **Database:** MySQL, MongoDB
- **Others:** FireBase, REST APIs, Git

PROJECTS

- **WithMeDocs** | **Internship** | **UpCloud**
 - This is a Digital HealthCare Project where I mainly worked on **React Library**.
 - My Role in the project was to implement app-wide theming in the application using **React Context API**.
 - I also worked on notification section with the Designing team and triggered custom toaster alerts.
 - I was also responsible for managing routes and navigation operations in the application using **React Router v6**.
- **Placement ERP System** | **Ongoing**
 - Working on **MERN Stack**
 - Designing and Developing User Interface as per the requirements along with the back-end team.
- **PG Management System**
 - Made this project using **React contextAPI**, **Redux-toolkit**, with **Firebase** as a **Real-time Database** and **Authentication**
 - This project was made to deal with a personal problem that I faced in managing our Paying Guests and their records.
- **Colorizer**
 - Worked on **React.js** and **REST APIs**.
 - This project was made to learn the structural design of a REACT application and fundamental workings of REST APIs.
- **FindTutorWeb**
 - Front-end for an Ed-Tech Tuition Website.
 - Worked on fundamental front-end technologies like **HTML**, **CSS**, **BOOTSTRAP**.
 - Later moved the app to React, refactored the code into multiple smaller and easily manageable components.
